DETAILED ACTION

1. The response of 3/15/04 has been received and considered.
2. The examiner apologizes for not appreciating the differences between the inventions claimed in the application before the first Office Action. A restriction requirement is presented below.

Election/Restrictions

3. A telephone call was made to Thomas Brennan on 5/17 & 5/18/04 to request an oral election to the above restriction requirement, but did not result in an election being made.
4. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-35 are directed to a system and method for defining and enforcing a security policy, classified in class 713, subclass 200.
 - II. Claims 36-38 are directed to a workflow management system, classified in class 717, subclass 102.
5. Inventions I and II are related as sub combinations disclosed as usable together in a single combination. The sub combinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions I and II have separate utility in that Group I has utility where a security policy can be defined for a group of users and managed accordingly; Group II has utility in monitoring the flow and progress of work (task management). See MPEP § 806.05(d).

Art Unit: 2134

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement, to be complete, must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
